TECHNICAL SKILLS

- **Languages:** Python, JavaScript, TypeScript, HTML, CSS, SQL
- **Frameworks:** React, Next.js, FastAPI, Flask, Tailwind CSS, SQLAlchemy, Pandas, Recharts
- **AI/ML:** Claude AI/Agent SDK, OpenAI API, LangChain, XGBoost, TensorFlow, Qdrant Vector DB, FashionCLIP
- **Tools:** Git, GitHub, PostgreSQL, MongoDB, Docker, Cloudflare Pages, Vercel, Render, Jupyter, Power BI, Tableau

EXPERIENCE

AI Developer | Glassbox Ventures

05/2025 - Present

Foo Restaurant Analytics Platform: Built a full-stack analytics platform (React 19, FastAPI, PostgreSQL) for a restaurant chain with 14+ outlets. Developed 100+ interactive visualization cards across 11 analytics pages covering sales trends, customer segmentation, platform comparisons, and menu optimization. Integrated Claude AI for natural language queries with streaming responses and implemented XGBoost predictive forecasting with 6-month horizons and confidence intervals. Deployed on Render + Vercel with 5-minute response caching.

Muse (AI Fashion E-Commerce): Designed and deployed an AI-powered luxury fashion platform for Indian shoppers using Next.js 16, FastAPI, Claude Agent SDK, and Qdrant vector DB with 1024-dim Qwen embeddings. Built a conversational AI styling assistant with semantic product search, FashionCLIP visual similarity matching, outfit builder, and personalization engine that learns from user behavior signals. Achieved 100% test coverage (175 tests) and sub-400ms API response times. Integrated Google OAuth, Razorpay payments, and real-time SSE streaming chat.

The Souled Store Finance Platform: Architected an enterprise financial reconciliation platform for 60+ retail stores across India, automating daily reconciliation of 40,000+ orders across 5 payment modes (UPI, Card, AMEX, Cash, District App) with T+1 settlement handling. Reduced processing time from 2-3 hours to 5 minutes and error rates from 4% to <0.1%. Drove ~₹4.6L in project revenue. Built role-based dashboards (store managers to C-suite) with anomaly detection, cash management tracking, and automated morning briefing alerts, using Next.js, FastAPI, and PostgreSQL. Designed to scale to 200+ stores.

Software Developer Intern | Augle AI

05/2024 - 05/2025

Developed a Retrieval-Augmented Generation (RAG) chatbot capable of answering real-time product questions from a knowledge base of 2,000+ scraped product details, using LangChain, PromptLayer, and the OpenAI API. Scraped and processed product data using Scrapy, cleaned and normalized it for LLM consumption, engineered prompts for optimal response quality, and integrated the AI model into a React.js frontend for a seamless user experience.

PERSONAL PROJECTS

ToolBox (toolbox-kit.com):

Built and launched a privacy-first platform with 165+ free browser-based tools for developers and designers using Next.js, TypeScript, and Tailwind CSS. All processing runs client-side with zero server-side data collection. Implemented Pro tier with on-device AI via WebLLM (WebGPU) and BYOK support for OpenAI/Anthropic. Sustains ~1,000 monthly organic visitors. Deployed on Cloudflare Pages with PWA offline support, SEO-optimized structured data (JSON-LD), and programmatic landing pages.

Skin Cancer Detection:

Built a CNN-based skin cancer classifier in Keras with image augmentation for melanoma vs non-melanoma classification. Created a Tkinter GUI for image upload and instant predictions.

Book Recommender Website:

Developed a book recommendation platform using collaborative filtering with a Flask backend for personalized suggestions based on user preferences.

EDUCATION

Nagindas Khandwala College, Mumbai University

2022 - 2025

Bachelor of Science in Artificial Intelligence and Machine Learning

Relevant courses: Machine Learning, Operating Systems, DBMS, Artificial Neural Networks, Statistics, Data Visualization
